

Práctica 1: Introducción diseño digital circuitos combinacionales Tecnología de Computadores 2021 – 2022 Grupo 9 Jareño Manzaneque

A. ESTUDIO FINAL PRÁCTICA 1

1. Captura de la Simulation Waveforms.

2. <u>Dibujar un esquema del circuito descrito en "P1.vhd" según el código VHDL.</u>

3. Obtener la tabla de verdad para dicho circuito.

| у | X | b | а | Z 1 |
|---|---|---|---|------------|
| 0 | 0 | 0 | 0 | 1 |
| 0 | 0 | 0 | 1 | 0 |
| 0 | 0 | 1 | 0 | 0 |
| 0 | 0 | 1 | 1 | 0 |
| 0 | 1 | 0 | 0 | 1 |
| 0 | 1 | 0 | 1 | 1 |
| 0 | 1 | 1 | 0 | 0 |
| 0 | 1 | 1 | 1 | 0 |
| 1 | 0 | 0 | 0 | 1 |
| 1 | 0 | 0 | 1 | 1 |
| 1 | 0 | 1 | 0 | 0 |
| 1 | 0 | 1 | 1 | 0 |
| 1 | 1 | 0 | 0 | 1 |
| 1 | 1 | 0 | 1 | 0 |
| 1 | 1 | 1 | 0 | 1 |
| 1 | 1 | 1 | 1 | 0 |

4. Obtener la función lógica a partir de la tabla de verdad para dicho circuito.

Primera forma canónica (Miniterms)

$$z_1 = \overline{yxba} + \overline{y}x\overline{ba} + \overline{y}x\overline{ba} + y\overline{xba} + y\overline{xba} + yx\overline{ba} + yxb\overline{a}$$

Segunda forma canónica (Maxiterms)

$$z_1 = (y + x + b + \bar{a})\big(y + x + \bar{b} + a\big)\big(y + x + \bar{b} + \bar{a}\big)\big(y + \bar{x} + \bar{b} + a\big)\big(y + \bar{x} + \bar{b} + \bar{a}\big)\big(\bar{y} + x + \bar{b} + a\big)(\bar{y} + x + \bar{b} + \bar{a})(\bar{y} + \bar{x} + b + \bar{a})(\bar{y} + \bar{x} + \bar{b} + \bar{a})(\bar{y} + \bar{a} + \bar{a})(\bar{y} + \bar{a} + \bar{a})(\bar{x} + \bar{a} + \bar{a})(\bar{x} + \bar{a} +$$
